

Date _____

Aim:

1. Developmental

a.k.a. anthropocentric or egocentric ethic

resources exist for our benefit and pleasure.
If it can be done, it should be done!

short term thinking for immediate benefits
no forward thinking

2. Preservation

a.k.a. biocentric ethic

preserve areas (especially the species present) that are important to future generations

(minimal environmental impact)

3. Conservation

a.k.a. ecocentric ethic

balance between resource use and conservation

most in line with concept of Sustainable Development
