AIM:

Characteristic	r-strategists	K-strategists
population graph	Two	The Trace
# of offspring per reproductive event	greater	fewer
parental care of offspring	little to none	care is given
lifespan	shorter	longer
body size	small	typically larger
time to reach reproductive maturity	shorter	longer
survivorship curve	% maximum lifespan	% maximum lifespan
ability to adapt to a changing environment	adapt well	have difficulty adapting
example organisms		
strategy summary	high reproductive rates to overcome massive loss of offspring	keep population stable near carrying capacity
