

Topic: Field Maps and Isolines

Aim: How are isolines correctly drawn on a map?

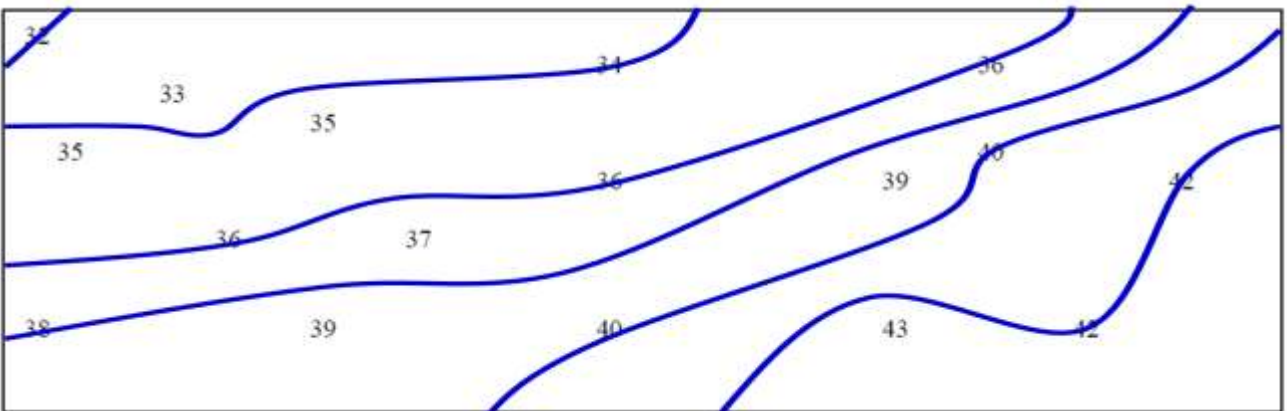

Rules:

1. Isolines must be drawn according to the interval.
2. Isolines cannot intersect. ← ***** a point in space can't have two different field values *****
3. An isoline must run to the edge of the map or connect back to itself.

1. Draw isolines on the map below using an interval of 10.

2. Draw isolines on the map below using an interval of 2.

3. Draw isolines on the map below using an interval of 20.
