

Topic: The Moon

Aim: How do the Moon and the Sun create “special” tides?

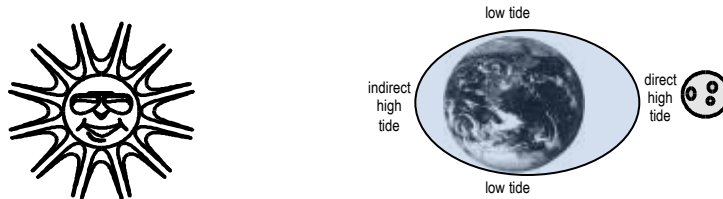

1. What is spring tide?

During a **spring tide**, the gravitational attraction of the Sun and the Moon work together causing high tides to be higher and low tides to be lower (more extreme tidal changes)

a

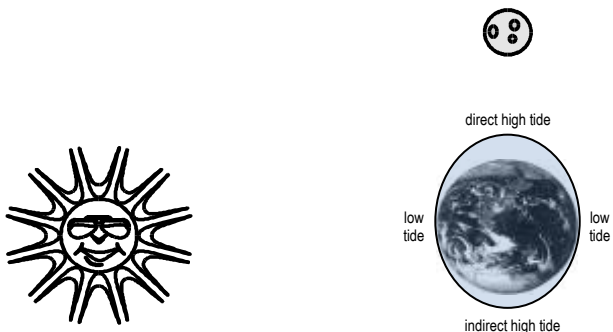

b

2. What is neap tide?

During a **neap tide**, the Sun and Moon work against each other causing the least difference between high and low tides

c

d
