

Topic: Rocks and Minerals
Aim:

Formation:

Locations Found:

1.

2.

Distinguishing Properties:

1. _____

3. _____

2. _____

4. _____

Types of Sedimentary Rocks

**a. CLASTIC / FRAGMENTAL
(inorganic land-derived)**

pieces of other rocks
cemented together

classified by
particle size

**b. CHEMICAL / CRYSTALLINE
(evaporites)**

seawater evaporates,
minerals precipitate
(fall out of solution) and get
cemented together

c. BIOCLASTIC / ORGANIC

organic remains
(remains of living
things)
get compacted together
